

European Contribution to the JT60-SA Research Plan

Meeting at the Strasbourg Convention Centre, DRESDE Room
Tuesday, 28 June 2011, 14:00-16:00

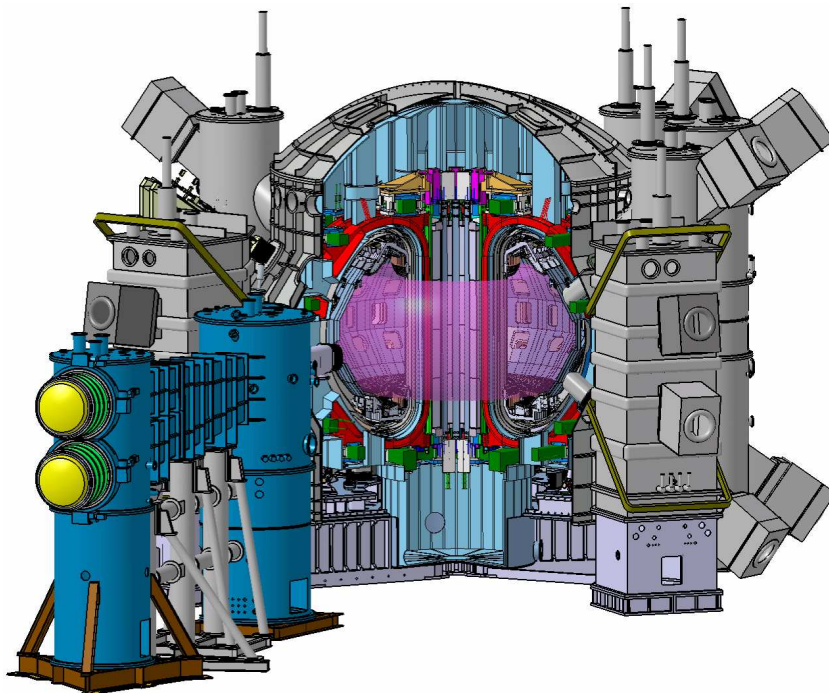

The meeting is open to all interested people

Scope of the meeting:

JT-60SA is a tokamak presently being constructed in Naka (Japan) as a joint programme between the Broader Approach Satellite Tokamak programme implemented by Europe and Japan, and the Japanese national programme. An activity has recently started in Europe, in the framework of EFDA, to contribute to the Research Objectives and Strategy of this machine, that is planned to start operation in 2016. This meeting intends to provide information on this activity and involve a wider community of physicists in the discussion of the JT-60SA Research Plan.

Meeting Agenda

14:00 – 14:30	EFDA/F4E joint activities on JT-60SA Physics	<i>G. Giruzzi (CEA)</i>
14:30 – 14:40	Questions / discussion	
14:40 – 15:00	Operation regime development	<i>I. Nunes (JET)</i>
15:00 – 15:20	Divertor, SOL, plasma-wall interaction	<i>R. Neu (IPP)</i>
15:20 – 15:40	Diagnostics	<i>F. Orsitto (ENEA)</i>
15:40 – 16:00	Final discussion	

For questions please contact G. Giruzzi : gerardo.giruzzi@cea.fr
